

Group access plugin for Atlassian Confluence

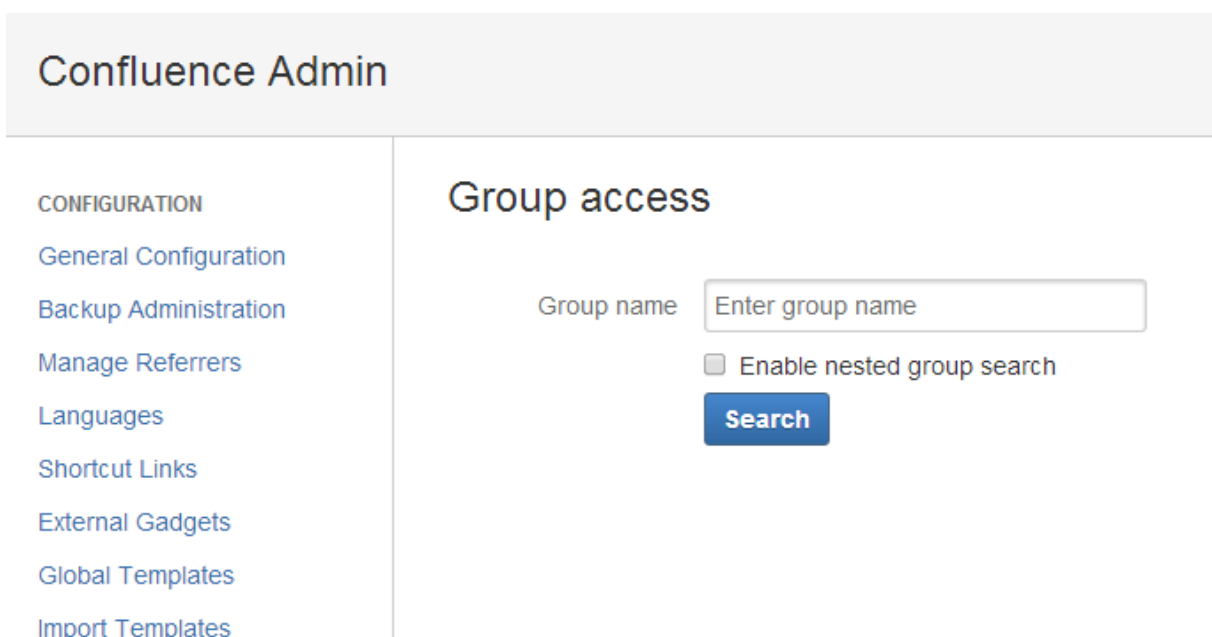

The plugin can be found under the „Confluence Admin“ view.

The link to the plugin appears on the left sided menu under „GROUP ACCESS PLUGIN“

The plugins interface looks like this

Input of the group name is done with an autocomplete field

Group access

Group name

 team-awesome up search

Search

Performing a search displays the list of spaces this group has access/permissions to

Group access

Group name

☐ Enable nested group search

Search

✓ Spaces found for group: team-awesome ✕

Team awesome space (TAS)

A search with the „Enable nested group search“ checked, performs a search that also considers the groups parent groups and their access/permission on a space

Group access

Group name

☒ Enable nested group search

Search

✓ Spaces found for group: team-awesome

Team awesome space (TAS)

Public tutorials space (PTS)
